TRADE WITH NONCONTIGUOUS POSSESSIONS

IN

FARM AND FOREST PRODUCTS,

1902-1904.

Compiled by the
DIVISION OF FOREIGN MARKETS.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1905.

LETTER OF TRANSMITTAL.

U. S. Department of Agriculture,
Bureau of Statistics,
Washington, D. C., July 21, 1905.

Sir: I have the honor to transmit herewith a compilation of the statistics of shipments of farm and forest products in the trade of the United States with its noncontiguous possessions for the year ending June 30, 1904, with those of two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, and the work has been done by the Division of Foreign Markets, under the direction of its chief, George K. Holmes.

This compilation is designed for the use of this Department and to meet the demands of a large number of correspondents, as it contains an arrangement of the statistics and a determination of totals, with various comparisons, that are not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin No. 37 of this Bureau.

Very respectfully,

W. M. Hays,
Assistant Secretary, in Charge.

Hon. James Wilson,
Secretary of Agriculture.

EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a customs-house.

IMPORTS FOR CONSUMPTION.—Goods which have passed from the control of customs officers into domestic trade in this country.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having "undergone no change in form or condition or enhancement in value by the application of labor in the United States."

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

TRANSIT OR IN TRANSIT TRADE.—Goods from a foreign country, passing through the United States on the way to the same or another foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country, without being entered as an import into this country.

In transit and transshipment trade is not included in the imports or exports of the United States, but is reported separately.

THE COUNTRY OF CONSIGNMENT is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

> Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.
>
> In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. * * * Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to *ad valorem* duties are defined by the act of Congress of June 10, 1890, as—

> The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

The value of domestic exports is their value at the time of exportation in the ports of the United States whence they are exported.

The value of foreign exports when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as for domestic exports.

Goods in transit through the United States from one foreign country to another are valued in the same manner as imports.

Valuation deceptions.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than the value of imports with specific duties or free of duty, or the value of exported articles; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement; and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

Weights.—In the official trade returns of the United States the weights of all articles exported are net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings.

All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

Discrepancies in foreign trade statistics of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not include c. i. f. charges (cost, insurance, freight) in the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes cost of delivery.

The United States trade returns include the free zones of Hamburg, Bremen, and Lübeck in Germany, while the statistics of the German Empire do not.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

Noncontiguous possessions.—The "noncontiguous" possessions of the United States are all those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and Pacific Oceans.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession, all other noncontiguous possessions, except the Philippine Islands, are included with the United States, thus, shipments from Hawaii to Guam are included in the total shipments from Hawaii to the United States.

TRADE WITH NONCONTIGUOUS POSSESSIONS IN FARM AND FOREST PRODUCTS.[a]

RELATIVE IMPORTANCE.

HAWAII FAR IN THE LEAD.

The value of the exports of domestic farm products to foreign countries, including the Philippine Islands, in 1904, was $859,160,264. With the Philippine trade eliminated, the value of domestic exports to foreign countries was $857,783,681. The shipments of farm products from the United States to its noncontiguous possessions, including exports to the Philippine Islands, were, in 1904, $13,481,501, or 1.6 per cent of the value just given for domestic exports to foreign countries, excluding the Philippine Islands. This value of shipments to noncontiguous possessions in 1904 was $5,000,000 more than the domestic exports of farm products to all South America and $5,000,000 less than the corresponding exports to all Asia. The value of farm products shipped to Porto Rico was about $600,000 less than the domestic exports of farm products to the British West Indies.

Leaving out the Philippine trade, the value of farm products imported from foreign countries in 1904 was $449,439,186, while the value of shipments of farm products to the United States from its noncontiguous possessions, including imports from the Philippine Islands, was 10.4 per cent of this amount. The value of the shipments from

[a] In every instance in this bulletin, unless specifically stated to the contrary, "United States" includes the country proper, together with Porto Rico, Hawaii, Alaska, Guam, Tutuila, and Midway Islands, but not the Philippine Islands. Hence the trade between all other parts of the United States and any noncontiguous possession includes shipments to and from that possession sent or received by the United States proper and any or all other noncontiguous possessions except the Philippine Islands. For instance, exports from the United States to Guam may include among the total shipments some from San Francisco and Honolulu, but none from Manila, and exports from the United States to the Philippine Islands may include shipments from Alaska, Puget Sound ports, Hawaii, Guam, Tutuila, and Porto Rico.

Hawaii in 1904 were about the same as the imports of farm products from the Chinese Empire and about one-half those from Brazil. The imports of farm products from the Philippines were $3,000,000 less than those from Germany, while the value of farm products shipped from Porto Rico to the United States about equaled the farm products imported from European Russia in the same year.

PERCENTAGE OF FARM PRODUCTS.

INFLUENCE OF SUGAR, COFFEE, AND MANILA.

The value of farm products shipped from Alaska was very small and unimportant when compared with the rest of the shipments from Alaska to the United States. No shipments of any merchandise from Guam or the Midway Islands were reported for 1904. For the remaining four possessions, the percentage of farm products in their shipments to the United States was very large. More than nine-tenths of the value of shipments of domestic merchandise from these possessions consisted of farm products. The returns from Tutuila give separate figures for only one item, copra; the other items are grouped together. In the shipments from Porto Rico, Hawaii, and the Philippines, 96 per cent of the value is due to farm products, mainly sugar, coffee, and manila. In 1904 sugar formed 75 per cent of the total shipments of domestic merchandise from Porto Rico to the United States and 97 per cent of the corresponding shipments from Hawaii. Manila formed 92 per cent of all domestic merchandise imported from the Philippines into the United States in 1904. Some noteworthy increases in shipments of articles which are yet relatively unimportant may be noticed in the tables in this bulletin.

The percentage of farm products in shipments from the United States to the noncontiguous possessions is much smaller than in shipments from the possessions to the United States. The largest percentage of farm products in shipments to noncontiguous possessions in 1904 occurred in the trade with Porto Rico, where the farm products formed 48 per cent of the total merchandise shipped from the United States. The percentage of farm products shipped from the United States to all possessions was about the same for 1903 and 1904.

[a] Domestic exports.
[b] Not given.
[c] Imports.
[d] Copra only; other farm products not specified.

FOREST PRODUCTS.

SMALL CONTRIBUTIONS TO UNITED STATES.

The forest resources of the noncontiguous possessions of the United States contribute practically nothing to the forest-product supplies of this country. The total value of shipments of forest products from all the noncontiguous possessions in 1903 and 1904 was about $27,000, distributed as shown in Table 2.

TABLE 2.—*Value of* **FOREST** *products shipped* **FROM** *noncontiguous possessions to the United States, 1903 and 1904.*

Source.	Year ending June 30—	
	1903	1904
Philippine Islands	$1,119	$12,248
Hawaii	6,347	3,351
Alaska	161	960
Porto Rico	2,450	
Total	10,077	16,559

On the other hand, lumber and timber have been shipped from the United States to the noncontiguous possessions in quantities relatively large; the total value for 1903 and 1904 was about $3,500,000, the value for 1904 being slightly less than that for 1903. The average annual

shipments to the Philippines, Alaska, and Hawaii for the two years amounted to about $450,000 for each possession, while the annual shipments to Porto Rico for these two years averaged a little less than $250,000. The total shipments of forest products to the rest of the noncontiguous possessions of the United States in both years were valued at $19,000. The statement in Table 3 gives the values of domestic forest products shipped to each possession for the two fiscal years named.

TABLE 3.—*Value of* **FOREST** *products shipped from the United States* **TO** *noncontiguous possessions, 1903 and 1904.*

Destination.	Year ending June 30—	
	1903	1904
Philippine Islands	$450,967	$561,774
Alaska	484,308	448,547

Porto Rico	247,567	228,495
Tutuila	4,854	4,223
Midway Islands	.....	740
Guam	9,623	.....
Total	1,713,207	1,673,336

SHIPMENTS TO NONCONTIGUOUS POSSESSIONS.

SHIPMENTS TO ALASKA.

Something more than one-half of the value of farm products shipped from the rest of the United States to Alaska during the fiscal year 1904 consisted of meat, dairy products, alcoholic liquors, meal and flour, and breadstuff preparations (including bread and biscuit), the total for these five classes being $1,780,000.

Other important articles mentioned in Table 4 are sheep, cattle, fruits, vegetables, and refined sugar. There was a decrease in the shipments of canned goods, meats, fruits, and vegetables—in 1904 as compared with 1903. The value of these three kinds of canned goods in 1903 was $352,000 and in 1904, $290,000. The decrease was due to a falling off in shipments of canned meats and vegetables. The fresh meats and fresh and dried vegetables increased in 1904 over 1903, but fresh fruits were less in 1904, while the value of canned and other preserved fruits were more than in 1903. The total value of farm products shipped to Alaska in 1904 was $348,000 more than in 1903.

SHIPMENTS TO HAWAII.

The most valuable group of the farm products shipped to Hawaii from the United States during the fiscal year 1904—grain and grain products—was valued at $1,526,000, and formed 43 per cent of the total value of farm products shipped. Of this group or class of farm products, wheat flour and barley were the most important articles, valued in 1904, respectively, at $513,000 and $478,000. The value of canned meats, canned fruits, and canned vegetables shipped to Hawaii increased from $148,000 in 1900 to $168,000 in 1903, and in 1904 was $175,000.

Table 5 shows increased shipments of live animals to Hawaii in 1904 as compared with 1903. The shipments of wines in 1904 were $44,000

more than in 1903, and the value of distilled spirits was $13,000 more than in 1903, while malt liquors decreased $24,000, the net increase for all alcoholic liquors being $33,000. Forest products shipped from Hawaii in 1904 were worth $86,000 less than in 1903. About two-thirds of the value of these shipments consisted of boards, deals, and planks.

SHIPMENTS TO PORTO RICO.

The value of farm products shipped to Porto Rico in 1904 was about $500,000 less than in 1903 and $400,000 more than in 1902. Rice and wheat flour made up 64 per cent of the value of shipments of farm products. The shipments of rice continued to increase during the three years ending with 1904. From 1893 to 1899, inclusive, the total exports of rice from the United States to Porto Rico were 12,000 pounds. In 1900, 5,000,000 pounds were exported; in 1901, the shipments were 37,000,000 pounds, and in 1904, 64,000,000 pounds.

The average export price of the flour shipped to Porto Rico in 1904 was $4.33 per barrel, which was 40 cents per barrel more than in 1903

and 47 cents more than in 1902. The number of barrels shipped in 1904 was 227,000, which was 41,000 less than in 1903.

Meat, meat products, and dairy products made 23 per cent of the value of the farm products shipped to Porto Rico during 1904. Vegetables, alcoholic liquors, refined sugar, and unmanufactured tobacco together made 9 per cent of the total value of farm products, and all other farm products formed 4 per cent of the total value.

[a] Chiefly pickles, sauces, and relishes, but including also some fresh vegetables.
[b] Including unmanufactured wood, not elsewhere specified.
[c] Classed as a forest product for the first time in 1904; figures for 1903 are given merely for purposes of comparison, and are not included in total forest products for 1903.

EXPORTS TO PHILIPPINE ISLANDS.

Exports of domestic farm products to the Philippine Islands in 1904 were $200,000 more than in 1903. About 58 per cent of the farm products exported in 1904 consisted of oats, alcoholic liquors, meat, and milk. Alcoholic liquors declined $200,000 from 1903 to 1904. Their total decline during the two years was about $400,000. Other important articles increased from 1903 to 1904. The oats were valued at $62,000 more in 1904 than in the year just previous, but less than in 1902. The value of meat exported to the Philippine Islands in 1904 was more than twice the value in 1903 and $40,000 more than in 1902. The milk exported in 1904 was valued at $134,000, while its aggregate value for 1902 and 1903 was only $61,000.

Domestic forest products exported to the Philippine Islands were valued at $300,000 more in 1904 than in 1902. As in the exports to Hawaii, the most valuable item of forest products was boards, deals, and planks, worth $411,000 in 1904. Other unmanufactured wood exported to the Philippines, together with a small quantity of wood alcohol, was valued at $132,000, and naval stores at $19,000.

SHIPMENTS TO GUAM.

The shipment of farm products to Guam during 1904 was the smallest in three years. All the products shipped during 1904 were sent in one month, February, 1904. The values of canned meats, canned fruits, and canned vegetables for the three years given in Table 8 were, respectively, $1,195, $1,329, and $1,177. The chief articles in which decreases occurred from 1903 to 1904 were meat products, breadstuff preparations (including bread and biscuit), refined sugar, and alcoholic liquors. The value of alcoholic liquors shipped in 1903 was $2,869, and none were shipped in 1904. There were no shipments of forest products to Guam during the fiscal year 1904.

SHIPMENTS TO TUTUILA.

There was a slight decrease in the value of farm products shipped to Tutuila in 1904 as compared with 1903, but the total value of canned meats, fruits, and vegetables increased. In 1902 these canned goods were valued at only $249 and in 1904 at $3,238. The largest single item shipped in 1904 was wheat flour, valued at $3,018. Sawed timber was the only forest product shipped from the United States to Tutuila during the fiscal year 1904. The shipments of farm and forest products to this island are shown in detail in Table 9.

SHIPMENTS TO MIDWAY ISLANDS.

The shipments of all merchandise to the Midway Islands during the fiscal year 1904 were small and consisted mostly of building material. Canned vegetables was the only item of farm products and its value was only $95. Sawed timber valued at $740 constituted the only item of forest products shipped to the Midway Islands. All merchandise sent to these islands from the United States during the year given was shipped from San Francisco.

SHIPMENTS FROM NONCONTIGUOUS POSSESSIONS.

SHIPMENTS FROM ALASKA.

"Domestic" merchandise as applied to the trade of the noncontiguous possessions of the United States includes merchandise which was produced anywhere within the United States, including, of course, the noncontiguous possessions with the exception of the Philippine Islands. Bearing this in mind, it is not surprising to find oranges and rice named as domestic products among the shipments from Alaska to the United States, for these articles were apparently the products of other regions of the United States, had been once shipped to Alaska,

and on their reshipment from Alaska were classed as domestic merchandise. The leading farm products shipped from Alaska to the United States during 1904 were live animals, alcoholic liquors, hides and skins, fruits, and butter, valued in all at $24,000. The rest of the farm products shipped were valued at $7,000. Of the shipments of forest products, the chief item, as is shown in Table 10, was spirits of turpentine.

SHIPMENTS FROM HAWAII.

Sugar formed the largest part of the shipments of farm products from Hawaii to the United States, and the quantity shipped was nearly three times as much as was shipped from Porto Rico during the fiscal year 1904. In this trade also the shipments during the past three or four years were very much larger than previously. Table 11 shows in millions of pounds the imports and shipments[a] of sugar from Hawaii into the United States for sixteen years.

TABLE 11.—*Quantity of sugar received into the United States from Hawaii, 1889–1904.*

Year ending June 30—	Millions of pounds.	Year ending June 30—	Millions of pounds.
1889	243	1897	431
1890	224	1898	500
1891	312	1899	462
1892	263	1900	505

1894	327	1902	721
1895	274	1903	775
1896	352	1904	736

Next in importance to sugar among the shipments from Hawaii to the United States was coffee, valued in 1904 at $169,000, less than 1 per cent of the value of the sugar. Other farm products sent from Hawaii to the United States, according to Table 12, were hides and skins, canned fruits, wool, and honey.

Of the forest products all but $141 worth was round timber.

SHIPMENTS FROM PORTO RICO.

The shipments of sugar from Porto Rico to the United States during the fiscal year 1904 formed 87 per cent of the farm products and 75 per cent of the value of all merchandise shipped to the United States from that island.

The sugar shipments from Porto Rico have increased greatly during the past four years. In only one year prior to 1899 did the imports of sugar from Porto Rico equal 100,000,000 pounds and in only one year after 1899 were the receipts less than 100,000,000 pounds. The annual receipts for each of the sixteen years 1889–1904 are shown in Table 13.

TABLE 13.—*Quantity of sugar received into the United States from Porto Rico, 1889–1904.*

Year ending June 30—	Millions of pounds.	Year ending June 30—	Millions of pounds.
1889	81	1897	87
1890	77	1898	98
1891	80	1899	107
1892	80	1900	73

1894	75	1902	184
1895	56	1903	226
1896	82	1904	260

The value of molasses shipped from Porto Rico to the United States in 1904 was the lowest in three years, being $69,000 less than in 1903 and $15,000 less than in 1902. The quantity of coffee, which had increased greatly in 1903, was reduced the following year from 6,000,000 pounds to 2,000,000 pounds, the decrease in value being $439,000. Nearly three times as much leaf tobacco was shipped from Porto Rico to the United States in 1904 as in 1903, and the value of oranges increased from $51,000 in 1902 to $231,000 in 1903 and $352,000 in 1904.

IMPORTS FROM PHILIPPINE ISLANDS.

Manila fiber, or abacá, produced in the Philippine Islands is valuable for its great tensile strength and its lightness, and is in great demand for the manufacture of binder twine and other cordage. Manila forms by far the greatest part of the exports from the Philippine Islands.

In the trade with the United States the imports of manila from the Philippine Islands form 92 per cent of the farm products. The quantity received in 1904 was 30,000 tons more than in 1902, and the increase in value amounted to $5,000,000. The reports of the Bureau of Insular Affairs show that the exports of manila from the Philippine Islands during the years 1902 to 1904 went chiefly to the United States and the United Kingdom. The relative quantity of manila sent to each of these two countries and to all other countries is expressed in Table 15.

TABLE 15.—*Percentage of quantity of manila exported from Philippine Islands to leading countries, 1902–1904.*

Country.	Year ending June 30—		
	1902	1903	1904
	Per cent.	*Per cent.*	*Per cent.*
United States	41	54	47
United Kingdom	51	39	46
Other countries	8	7	7

In consequence of the act of March 8, 1902, the tax levied on manila exported from the Philippine Islands to other countries is not levied on the manila exported to the United States directly. The United States prior to the passage of this act had been importing a considerable quantity of manila by way of the United Kingdom. In 1903 there was a marked increase in the imports of this fiber into the United States from the Philippine Islands and a decrease in the imports from the United Kingdom. The increase in the relative quantity exported from the Philippine Islands to the United States appears in Table 15.

The total value of manila exported from the Philippine Islands to all countries in 1904 was $22,000,000 and the number of tons 130,000.

The sugar industry in the Philippine Islands reached the height of its development in 1893 and since that year has undergone some decline. Most of the sugar exported from the Philippine Islands goes to Japan, China, and Hongkong, and only a relatively small percentage is exported to the United States.

The percentages in Table 16 show the relative quantity of sugar exported to the Orient, the United States, and other countries.

TABLE 16.—*Percentage of quantity of sugar exported from the Philippine Islands to leading countries, 1902–1904.*

Country.	Year ending June 30—		
	1902	1903	1904
	Per cent.	*Per cent.*	*Per cent.*
Japan, China, and Hongkong	88	63	85
United States	8	31	15
Other countries	4	6	.....

The total value of the sugar exported to all countries from the Philippine Islands in 1904 was $2,700,000 and the number of pounds 166,000,000.

The imports of unmanufactured tobacco from the Philippine Islands in 1903 were valued at $50,000; in 1902 at only $3, and in 1904 at $533. The total value of the tobacco exports from the Philippine Islands to all countries, however, exceeded $1,000,000. Most of this was sent to Spain and a considerable quantity to Austria-Hungary.

An article of importance second only to sugar in the export trade of the Philippine Islands is copra, which is not mentioned in the United States import statistics. Most of this copra, or dried meat of the cocoanut, is exported to France and less than one-half of 1 per cent to the United States.

Table 17 shows important gains in the value of farm and forest products imported from the Philippine Islands during the three fiscal years ending with 1904.
